Offset printing is done for the highest quality printing purposes. There are no limitations on the size, circulation, or kind of the job that we offer through offset printing. Due to the higher costs for initial setup, offset is often most economical for large volumes of prints, for example for color documents with 500 copies or more.

Apart from superior quality, offset printing has price as its main advantage: The more you print, the cheaper the price per individual copy. For more information on offset printing please visit pulse-copy.com.
